DETAILED ACTION

Allowable Subject Matter

Claims 1 – 4 are allowed.

The following is an examiner's statement of reasons for allowance: regarding claim 1, the prior art of record, considered alone or in combination, fails to teach the claim limitations "...storing the data to be recorded in the memory circuit; defining data from a start location of the data stored in the memory circuit to an end- point before a location corresponding to a next writable address as a first data portion; defining data from the location corresponding to the next writable address to an end location of the data stored in the memory circuit as a second data portion; and controlling the recording/reproduction section to record the second data portion temporally before recording the first data portion."

Regarding claim 2, the prior art of record, considered alone or in combination, fails to teach the claim limitations "...determining whether or not an ECC cluster including the location specified by the recording instruction is replaced by a replacement cluster; determining whether or not a read-modify-write process is required; when it is determined that the ECC cluster including the location specified by the recording instruction is replaced by a replacement cluster and the read-modify-write process is required, determining a specific location in the user data area where access time from the recording location of the replacement cluster is less than or equal to a predetermined time as a recording location at which the data is to be recorded; controlling the recording/reproduction section to record the data at the determined

Art Unit: 2627

recording location.” Claim 3 is also allowable at least due to its dependence upon claim 2.

Regarding claim 4, the prior art of record, considered alone or in combination, fails to teach the claim limitations “...receiving a recording instruction specifying at least a location at which data is to be recorded; determining whether or not an ECC cluster including the location specified by the recording instruction is replaced by a replacement cluster; determining whether or not a read-modify-write process is required; when it is determined that the ECC cluster including the location specified by the recording instruction is replaced by a replacement cluster and the read-modify-write process is required, determining a specific location in the user data area where access time from the recording location of the replacement cluster is less than or equal to a predetermined time as a recording location at which the data is to be recorded; controlling the recording/reproduction section to record the data at the determined recording location.”

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Response to Arguments

Applicant's arguments with respect to the prior art rejections of claims 2 – 4 have been fully considered and are persuasive. The prior art rejections of claims 2 - 4 have been withdrawn.
